### **DETAILED ACTION**

1. The Instant Office Action is made in response to a Request for Continued Examination filed 7/17/2007.
2. Claims 6, 12, 21, 27, 36, and 42 are currently amended.
3. Claims 46-87 are newly presented for examination.
4. Claims 6, 12, 21, 27, 36, 42 and 46-87 are currently pending in Instant Application.

### ***Election/Restrictions***

**MPEP 811[r3]** recites that "the examiner should make a proper requirement as early as possible in the prosecution, in the first action if possible, otherwise, as soon as the need for a proper requirement develops. Before making a restriction requirement after the first action on the merits, the examiner will consider whether there will be a serious burden if restriction is not required." (emphasis added). In this case, the Claims create a serious burden on the Examiner. Accordingly, a restriction requirement is being made herein.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 6, 46-51, 21, 60-65, 36, 74-79, drawn to simulation of models and trace data reporting, classified in class 703/22.
- II. Claims 12, 52-59, 27, 66-73, 42, 8-87, drawn to receiving HDL files and parsing them for information, classified in class 703/13.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated but for being on the same subject area of simulation. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are simulation of modeling and trace data reporting, and parsing of HDL files.

Art Unit: 2128

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was not made because the election is deemed complex and therefore did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 2128

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
